

MYR GROUP PROJECT EXPERIENCE

Windsor Batch Plant

Project Owner
Owens-Illinois

Location
Windsor, Colorado

Magnitude
The project team provided and installed new electrical services, owner furnished MCs and control panels, and wired and terminated all associated instrumentation and motor controls.

To increase production on the job, work packets were created for each floor which contained more than 1400 instruments and motors. Therefore, electrical document measurements required conversion. Original CAD drawings were based on European design standards, the documents lacked additional basic information so pre-planning and detailing became a daily design-on-the-go process. Extensive use of our prefabrication shop reduced the number of electricians required at the job site, thereby reducing congestion in an extremely limited workspace.

Duration
January 2005 through August 2005

MYR Group Headquarters Location
1701 Golf Rd., Suite 3-1012, Rolling Meadows, IL 60008
Phone 847.290.1891, Fax 847.290.1892
